Hydraulic Hand Jacks.....

BLACKHAWK IS YOUR BEST BUY

Blackhawk, the world's leading manufacturer of Hydraulic Tools, offers a complete line of Hydraulic Jacks and Lifting Equipment designed and built to give you years of profitable, trouble-free performance. To insure the finest quality products obtainable, Blackhawk Jacks undergo approximately 200 manufacturing operations involving some 25 different materials. This is one reason why Blackhawk Hydraulic Tools enjoy a world-wide reputation for excellence... in service and long life. Only with Blackhawk can you choose with confidence the right equipment for the right job!

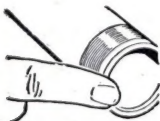

Cross-Milled Heat-Treated Saddle — Sharp as a hound's tooth. Cuts through dirt, grease and ice for firm, safe grip!

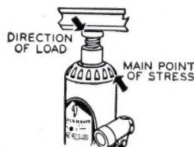

Service in Field — Less down-time, jack does not have to be dismantled! All valves located under one cap screw — easy to get at for on-the-spot cleaning, checking.

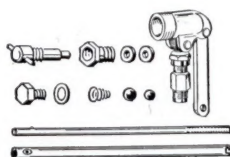

Interchangeable Pump — Easily replaced in the field with ordinary wrench. Vital pump is separate unit, available at a nominal cost.

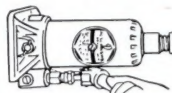

Mirror Finish Cylinders — Exclusive Blackhawk process provides mirror finish inside plunger and pump cylinders for longer life.

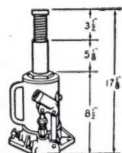

Tough Malleable Iron Top Cap — Solid rigidity! Supports off-center loading encountered in lifting today's heavier trucks, buses.

68% Interchangeability of Parts — Easy maintenance, lower repair costs, smaller part inventories, less down-time on equipment!

Full power on side — Blackhawk originated pump-on-side feature; extra utility for pushing operations! Convenient two piece handle stores easily in tool box or carton.

New Design Lifting Specifications — The only completely redesigned jack line that gives you the right capacity with the right lift!

GAUGE EQUIPPED

Equip your Blackhawk Hand Jacks with gauges for fast, accurate, low-cost laboratory, production and construction tests. On the job reports prove that Blackhawk gauges are widely used for fatigue, deflection, stress and rupture tests; testing of materials, welds, castings; testing density of soil and road surfacing materials.

Two types of Blackhawk gauges measure "Lbs. Total Load" or "Lbs. Per Sq. Inch." "Lbs. Per Sq. Inch" gauges register internal fluid pressure of jack for testing. Order C-107L for CG-9B and DG-8.7B; Z-722 for all 20, 30, and 50 ton DeLuxe Heavy Duty Jacks.

All Blackhawk gauges are highly accurate and conform to Government Standards with variations of only plus or minus 2%.

Low Cost Bumper Jacks

SCREW, RATCHET, HYDRAULIC

BUMPER JACKS

Now from Blackhawk, one complete line of bumper jacks. They're tough, they're low cost! No matter what the favorite... sturdy tripod, sure-footed bipod, fast-acting ratchets, powerful hydraulic... Blackhawk has it! And every one designed to give trouble-free service, positive safety... and at a coin purse price. Take a look, your favorite is here!

Two sturdy, low cost tripods, J-1, J-2. Lightweight J-1 is a handy passenger car jack... a top value for service station resale. Tougher, more rugged J-2 is a real buy for service station use or resale.

- Effortless Lifting — So simple a woman can do it! Swivel Top winding zips lifting hook up, even with full load!
- Non-tip Support — Even on rough ground. Triangular design adjusts automatically... Gives you level, safe lift!
- Easily Stored — Folds like an accordion... means space-saving storage when not in use!
- Bigger Capacity — J-2 is heavier. Handles full 3000 lb. capacity loads with ease.

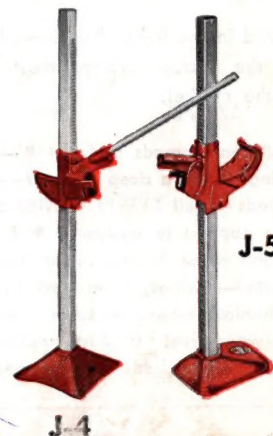

NEW
J-6

The J-4 is a real buy for passenger car use and service station resale. It gives years of service at a low, low price.

- Built to take abuse — Solidly built with zinc plated, rust proof rack bar!
- Safe — Large oversized base centers weight load!

J-5 fits all cars... self-adjusting lift hook "form-fits" every bumper for sure, safe lifting.

- Effortless positioning — Lifting hook glides freely!
- Protects bumper — Exclusive two-point contact stops bending, chrome damage!
- No slipping — Large 48 sq. in. non-tip safety base!

Handy, compact, with new 2-position hook... that's the J-6 bipod bumper jack. New swivel handle requires minimum effort!

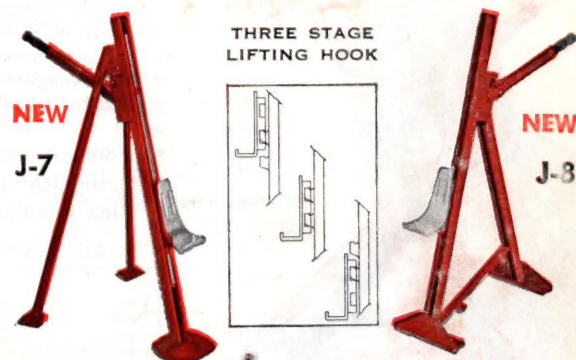

- New 2-position lift hook goes low, lifts high, fits every style bumper.
- Extra wide Feet — Loads are always firmly anchored.
- Extra Safe — Automatic safety latch! Jack can't "creep"!

J-19

Versatile J-19 hydraulic utility and bumper jack is useful anywhere powerful hydraulic force is needed!

- Easy to Use — No winding, no cranking... just a few light strokes raises any load up to 3,000 lbs.!
- Lifts All Cars — Full 19" hydraulic lift plus adjusting hook gives ample clearance.
- Rattle-Free — Strong carrying and storage carton fits any trunk.
- Easy Release — Just one turn of release valve lowers load safely, gently!

Both J-7 and J-8 have fixed handle... does not ride up and down with load. Both have 3-stage lifting hook that gets lower, lifts higher... reach from 4 1/4" to 33 1/4" more than enough for every car! Lift hook fits every style bumper. Handy storage rack holds lift hook... handle folds!

- J-7 Tough tripod with telescoping ratchet action.
- Exclusive lock safely holds rear legs.

- J-8 Quick lifting bipod has wrap-around steel lift channel.
- Extra wide, tip-proof base for more support.

BLACKHAWK®**Hydraulic, electric, air,****THERE'S A MODEL FOR YOU IN****SJ-25****Service Chief®****THE ONE HYDRAULIC ONE-END LIFT THAT HANDLES LATE MODEL CARS . . .**

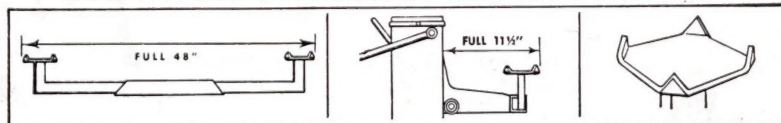

Proved in the field. Engineered to take the toughest punishment. It's the fastest acting, most versatile hydraulic one-end lift on the market.

- Lift bar spreads to full 48" — gets past guards, unusual bumper styling!
- Extra deep elevator — Gets way under to lift by brackets or pads — full 11½"!
- Wide 5" x 5" saddles — Firmly grip with extra support to bumpers!
- No trunk obstruction — Jack always remains same height . . . car trunks always accessible!
- Easy-grip handle — Swings down next to channel. Never in way!
- Safe, Mechanical release — Lowers jack safely, quickly every time . . . it's worry-free!
- Fast positioning — Tricycle gear with swivel "nose" wheel adds extra maneuverability. A real time saver!

**SJ-75 ELECTRIC ONE-END LIFT**

Push button lifting is here in model SJ-75 battery-operated hydraulic one-end lift. It's four times faster. There's no winding, cranking, pumping! It's as easy to operate as turning on a light. No complicated maze of wires, cords because SJ-75 is completely self-contained! Standard battery lifts 1½ tons in less than 30 seconds! And all the big features of the Service Chief are built in.

- Weatherproof battery storage completely self-contained.
- Mechanical safety release positively locks automatically.
- Wide handles and swivel nose wheel aids maneuvering.

OUTSTANDING FEATURES OF THE SJ-25 AND SJ-75

Exclusive! Wide spread — Lift bar spreads of 14"–48". Blackhawk end lifts have it! Easily clears guards, tail pipes, hitches for easier, safer lifting every time.

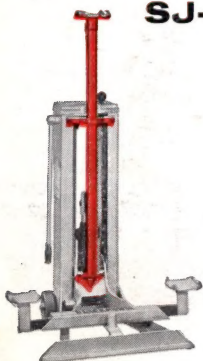

Exclusive! Long reach — Extra deep elevator allows Blackhawk end lift to get past bumper, and lift on brackets or frame.

Exclusive! Big 5"x5" saddles won't damage bumpers . . . spreads weight evenly . . . tightly grips bumper, brackets, pads.

SJ-1007 FOR EXTRA LIFT ON HOIST JOBS

- Changing or greasing springs. • Removing shock absorbers. • Adjusting brakes. • Undercoating. • Repairing differential. • Replacing full-flow filters. • Replacing tail pipes and mufflers. • Replacing hard-to-get-at oil filters. • Tire inspection. • Greasing universal joints.

Now you can service cars on hoist without costly equipment. New low-cost Hi-Lift Kit as accessory means your Service Chief doubles as a high lift jack at a fraction of the cost . . . eliminates the need for an extra man, extra tools. Work at eye level . . . no bending or stretching. Hi-Lift Kit assembles on your SJ-25, SJ-51 and SJ-75 in one minute. Pick up extra profits with your Service Chief . . . get your SJ-1007 Hi-Lift Kit now!

SJ-11 MECHANICAL

Jeep-Jack®

Thousands of service stations agree . . . The SJ-11 Jeep-Jack one-end lift has no rival! Proven air-frame construction is tops for strength and portability! Use it everywhere . . . on the wash rack, drive or in the service department, service truck or "cycle." "Flip-Fit" double adjustable saddle supports quickly flip to either of two positions for

varying bumper styles. Famous Saginaw Screw coupled with free-moving universal handle action insures the easiest, quickest lifting on the market. Eight friction-killing nylon pads give an easy lift every time. Automotive men call it the finest mechanical service jack ever built. It's always ready for routine or emergency jobs, year after year.

SPECIFICATIONS

High lifting height	29"	Saddle spread	4½" x 22¼"	• Air-frame construction.
Low lifting height	7¾"	Weight	50 lbs.	• Flip-Fit saddles.
Total height	33"	Capacity	1½ tons	• Lightweight portability.

SJ-12 HYDRAULIC

Lightning

You asked for it! A low priced hydraulic one-end lift with lightning contact. Now it's here . . . the portable 1½-ton SJ-12 "Lightning!" This tough jack with proven air-frame construction for toughness and portability has the quickest contact of all! Just pull up the

lift column and the "Flip-Fit" saddles tightly grip the bumper. Smooth hydraulic power does the rest! Spring controlled release lever and mechanical safety locks gives double safety! Toss this rugged jack into your service truck for really fast road service.

SPECIFICATIONS

High lifting height	29"	Saddle spread	4¼" x 22¼"	• Quick contact.
Low lifting height	7⅞"	Weight	70 lbs.	• Air-frame construction.
Height of jack	34"	Capacity	1½ tons	• Easy portability.
				• Hydraulic power.

BLACKHAWK®

A Complete Line of

Building dependable service jacks is the end result of continuous research in determining what the field needs in keeping pace with ever-changing car and truck styling. This is why Blackhawk is always first in modern, job-designed equipment. When you use

Blackhawk Service Jacks you make more money because you have equipment designed and manufactured to give years of trouble-free service. The exclusive jack features described below illustrate why Blackhawk is your best service jack buy every time.

SJ-23 IMPROVED, TOUGH 1 1/2-TON CURB JACK

This time-tested 1 1/2-ton curb jack is the basic floor jack for service stations, garages, dealers. New exclusive features add up to a "must" buy!

- Hermetically sealed power unit is one piece malleable iron — No plugs, seams, breather holes to leak oil, catch dirt or water.
- No accidental lowering — Safe, stand-up handle disengages release valve automatically. It can't be lowered accidentally!
- Stronger, wider lifting arm — Now made of malleable iron. Wider arm gives extra support, longer life!
- Easier maneuvering — Wider swivel wheels and axle. Positions jack instantly — no wasted motion!
- More floor clearance — Redesigned frame! Jack slips under lowest overhangs. Less stooping, less squatting!

SJ-17 has all the important features of the SJ-23 but has fixed wheels and saddle. Popular for garage and road service, for quick tire changes, brake adjustments, wash rack jobs.

SJ-18 2-TON SERVICE JACK COMBINES STRENGTH WITH STYLING

Never before has so much been offered in a two-tonner. It's as modern as tomorrow's cars. Handsome showroom styling plus the many features below all add up to the best 2-ton buy ever!

- Less weight — more strength — Made of one piece aluminum alloy.
- Lightning lift — two pumps in one — Speed to contact load quickly and power to lift the heaviest loads! And it's automatic!
- 3-Piston handle — Full power stroke in any of 3 positions.
- Leak-proof — Vital power unit is one piece malleable iron. No seams or plugs to wear!

S-4 MOST DEPENDABLE 4-TON SERVICE JACK ON THE MARKET

Here's the most popular 4-ton service jack in the field! The S-4 handles all cars and light trucks with equal ease. It's been service tested, proved on the job. The S-4 can't be beat:

- Built like a bridge — Rigidly bolted at 12 points! You get years of full capacity loads with no distortion.
- Fingertip control — Every vital control is at the handle. No searching, bending for hard-to-get-at levers!
- Avoid unauthorized use — Key locks release valve! Prevents accidents!
- Fast positioning — Extra low chassis slips under lowest axle, frame!
- Fast spotting — Built in spotlight "peeks" under load for time saving positioning!
- Free floating lifting arm and exclusive hollow plunger keep all dangerous side stresses from vital power unit — gives trouble free service year after year!

JACKS**

SJ-16, TEN-TONNER HANDLES THE BIG JOBS

Full 10 tons of power for anything that rolls into your shop. New, improved saddle and swivel wheels lets you sneak this service-proved bull dozer under the lowest axle trucks. There's less stooping — less squat-

ing — easier spotting because long, low chassis glides under overhangs faster. Big 18" lift range assures more than working clearance. Faster load contact with convenient foot operated pump . . . saves you time!

- Safety lock on handle prevents accidental lowering for greater efficiency, easier operating
- Large Cupped Saddle for solid support
- Wide base gives extra sturdiness
- Long frame (66") reaches under overhanging bodies. Easy spotting, faster working
- Full or part stroke lift means no wasted motion

- Roller bearing front wheels means easier dollying, positioning. Do more jobs faster
- Foot pumping assures faster load contact
- Featherweight handle has spring balance for ease of operation. A few light strokes lift any load

SPECIFICATIONS

	SJ-16	SJ-20
Frame high point	8 $\frac{3}{8}$ "	10 $\frac{1}{4}$ "
Saddle low point	7"	8"
Saddle high point	24 $\frac{3}{4}$ "	25 $\frac{1}{2}$ "
Lifting range	17 $\frac{3}{4}$ "	17 $\frac{1}{2}$ "
Frame length	66"	68 $\frac{1}{2}$ "
Handle length	40"	40"
Width	22"	24 $\frac{1}{2}$ "
Capacity	10 tons	20 tons
Weight	350 lbs.	530 lbs.

SJ-20, LIFTS 20-TON LOADS WITH EASE

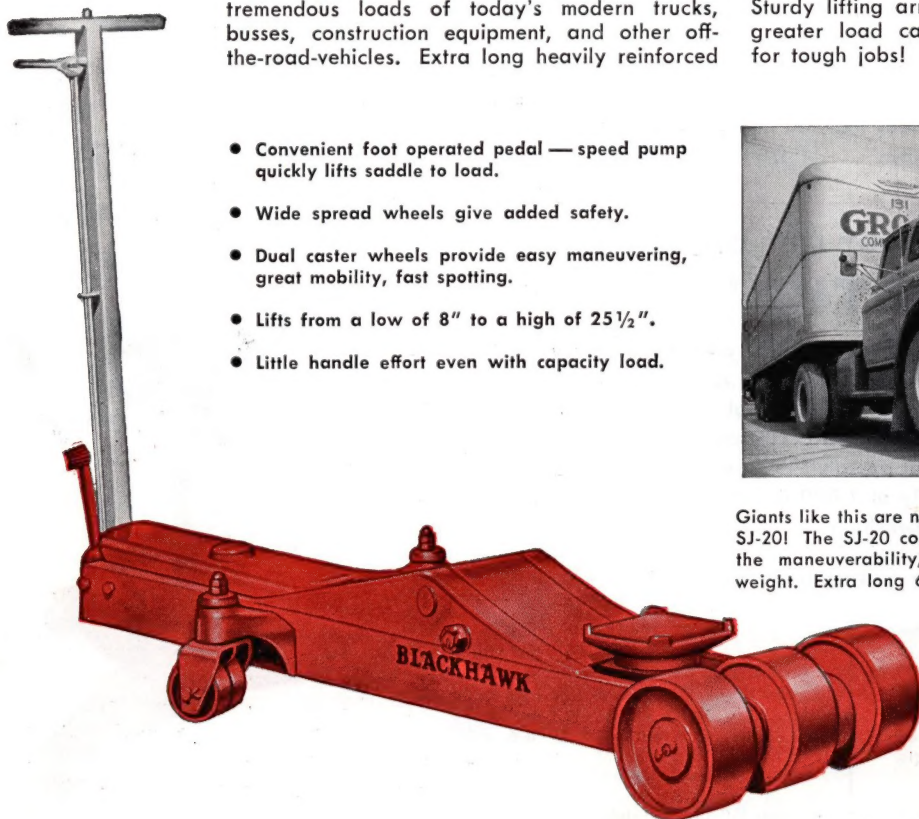

With a service giant like this you can lift the tremendous loads of today's modern trucks, busses, construction equipment, and other off-the-road-vehicles. Extra long heavily reinforced

main frame with welded box-type construction. Sturdy lifting arm, three large front wheels for greater load carrying ability . . . a tough jack for tough jobs!

- Convenient foot operated pedal — speed pump quickly lifts saddle to load.
- Wide spread wheels give added safety.
- Dual caster wheels provide easy maneuvering, great mobility, fast spotting.
- Lifts from a low of 8" to a high of 25 $\frac{1}{2}$ ".
- Little handle effort even with capacity load.

Giants like this are no problem with the tough, fast-lifting SJ-20! The SJ-20 combines the strength of a giant with the maneuverability, ease of operation of a featherweight. Extra long 68 $\frac{1}{2}$ " chassis slips under overhangs with ease. Foot operated speed pump quickly moves saddle to load. Full 20-tons of power lifts heaviest loads with just a few light strokes of the handle.

BLACKHAWK®

T - Lifts . . . for safe

FOR EASIER AUTOMATIC TRANSMISSION SERVICE

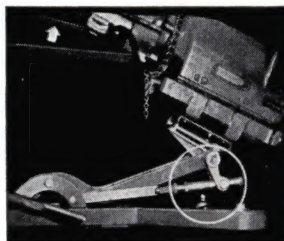

T-1 "LO-MATIC"

Now one man equipped with this new T-Lift can service transmissions faster than ever before. This T-Lift moves transmissions safely in any direction with precise, effortless control for perfect positioning and alignment.

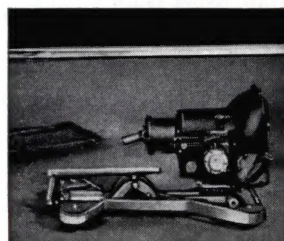

Safely "float" transmission into exact position without tough manual handling. Sure-grip chain holds load safely in place, won't damage pans. Saddle tilts 56 degrees forward, 6 degrees backward and 10 degrees to either side. Now it's a cinch to align locating dowels and bolt holes. Time-saving "All-Make" adaptor adjusts quickly to support all current and future automatics. Rugged unit is easily handled and positioned when working underneath car. Four large swivel casters are spaced for maximum stability, ease of movement.

Now there's no reason to turn down extra profitable business because you aren't properly equipped. With this low-cost, high-profit making T-1 you can handle all the car transmission jobs that roll into your shop. Every service shop should have at least one "Lo-Matic."

Safely "float" transmissions into exact position without dangerous manual handling and juggling! Handles more jobs because it works faster!

Easy to maneuver! The "LO-MATIC" slips easily under modern low-slung cars. All controls are easy to reach from creeper.

T-1 SPECIFICATIONS

Capacity	1,000 lbs.
Minimum Low Height*	5½"
Maximum Height*	24"
Length, overall	35½"
Width at widest point	20½"
Shipping Weight	95 lbs.

*Adaptor adds ½"-3½" to height

FOR CARS ON TWO POST LIFT OR OVER PIT

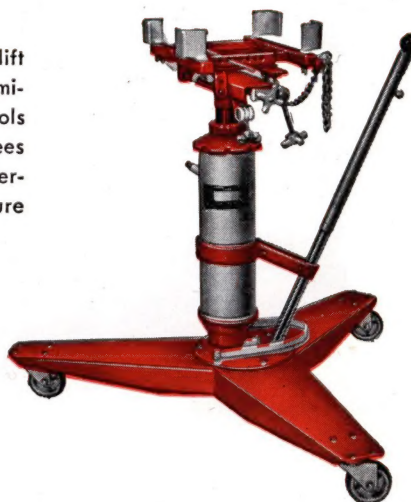

T-2 "HI-MATIC"

The answer to fast one man transmission service on cars standing on two-post lift or over a pit. Exclusive "Dual Range" raises up to 72" . . . lowers to 32", eliminates manual lifting. The fast adjusting Universal Adaptor has precision controls which tilt it forward 28 degrees, backward 10 degrees, right and left 13 degrees and laterally 3". Two-speed foot operated release valve saves time. Built-in overload valve releases automatically at 1,000 lbs. Large, free rolling wheels assure smooth, easy dollying to work bench.

T-2 SPECIFICATIONS

Capacity	1,000 lbs.	First Stage	¼" per stroke
Minimum Low Height*	28¼"	Lift of Ram per Pump Stroke	Second Stage
Maximum Height*	69"		½" per stroke
Caster Center	3 equally spaced on 38" dia.	Adapting Ram Socket	1" dia. x 3" deep
Pump Stroke	8"	Shipping Weight	135 lbs.
Reservoir Capacity	4 qts.		

*Carrier adds 3⅞" and Adaptor adds ½"-3½" to height

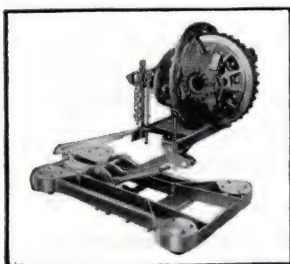

easy one-man operation

T-LIFTS

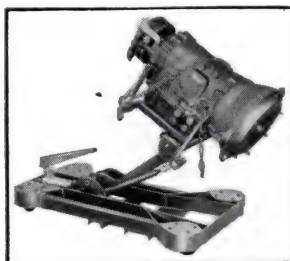

FOR FASTER TRUCK TRANSMISSION SERVICE

New T-4 truck transmission jack

Newly redesigned T-4 is especially engineered to tilt to either side as well as front and back. With this rugged workhorse you can tilt any truck transmission or differential 45° forward, 12° back and 10° to either side. With sure-spot accuracy you can easily remove or install **all** shapes, **all** sizes, **all** makes of automatic transmissions, differentials and clutches! All angle pump rotates 360° for fast, convenient operation.

Extra long support bars handle any type or size differential, and carrier assemblies. Conforming chain sling holds unit . . . no extra adaptors, parts.

Combination controlled and floating side to side and front to back tilt permits unit to clear every obstruction. Allows pinpoint positioning during transmission removal or replacement.

T-4 SPECIFICATIONS

Weight	250 lbs.	Adaptor Height — Lowered	8 1/8"
Height O.A.	8 1/8"	Adaptor Height — Raised	31 1/4"
Width O.A.	29 3/8"	Wheel Diameter	4"
Length O.A.	46 5/8"		

FOR EXTRA PROFITS FROM TRANSMISSION SERVICE

T-3 "T-MATIC"

Here's the low cost transmission jack for real economical transmission service for cars on any type lift or over pit. This dependable, light weight "T-matic" has all the important work-saving features of the T-2, except for the dual range. Easy one man operation, precision controlled positioning with fingertip action and easy maneuvering make this jack ideal for fast transmission service. Light weight amazingly low-cost, this T-lift brings you extra profits from transmission service — puts you in business in a fast growing field.

T-3 SPECIFICATIONS

Capacity	1,000 lbs.	Caster Centers	3 equally spaced on 38" dia.
Minimum Low Height*	38"	Reservoir capacity	3 qts.
Maximum Height*	69 1/2"	Shipping Weight	125 lbs.

*Carrier adds 3 1/8" and Adaptor adds 1/2"-3 1/2" to height

Do More Jobs Quicker, Easier, With These Accessories

For Replacement

TK-70 Universal Adaptor. Standard Equipment on T-2, T-3. Contains precision controls for controlled tilt and lateral slide. Holds "All-Make" Adaptor.

TK-320 "All-Make" Adaptor. Standard equipment on all T-Lifts. Fits any automatic and conventional car

or truck transmission up to 500 pounds excepting those handled by TK-19.

For Added Versatility

TK-11 Engine Support Kit holds and protects engine, pan and connections.

TK-19 Adaptor for '50-'52 Powerglides with-out removable rear engine mount bracket.

BLACKHAWK®

Time saving wheel dollies

SLASH TIRE-WHEEL JOB TIME 80%

Remove, replace, lift and transport heavy truck wheels . . . both single and dual faster and easier than ever before! End the high cost of equipment downtime with Blackhawk Wheel Dollies . . . handle loads up to 2600 lbs. with ease! Speeds fleet maintenance like no other wheel dolly on the market. They're a **MUST** for every wheel, tire and brake job . . . ends damage to grease retainers, bearings!

Blackhawk Wheel Dollies cut job time up to 80% because only one man is needed to completely service all four wheels instead of three men with obsolete greased tin and sledge hammer methods. Three units to choose from in both mechanical and hydraulic models! Check the individual features of all three models and then start servicing your heavy equipment the fast, labor saving way!

WD-10 MECHANICAL WHEEL DOLLY 1500 LB. CAPACITY

Every shop can afford this tough, inexpensive WD-10 mechanical wheel dolly that handles **all** diameter tires up to 1500 lbs! It's tops for removing, replacing, lifting and transporting heavy single or dual wheels. Has easy-action scissors-type jack and reversible ratchet and self-locking screw.

- Three ball bearing swivel caster wheels offer extreme maneuverability.
- Lifting arm revolves . . . eliminates tugging, pushing.
- Adjustment screw assures perfect horizontal alignment with axle shaft.

WD-20 HYDRAULIC WHEEL DOLLY 1500 LB. CAPACITY

This powerful, fast-acting Blackhawk Hydraulic Wheel Dolly is built for rugged use, trouble-free service. Vital equipment in every city, county, utility, motorbus and truck transport service garage. Slash downtime by speeding brake repairs, tire switching, wheel lubrication . . . and without damaging vital parts. Handles every diameter tire, both single and dual!

- Large 4" swivel wheels, ball bearing casters for effortless maneuverability.
- Free moving lifting arm rollers help you align wheel in seconds.
- Specially designed 2" leveling adjustment screw helps you align wheels to axle with pin-point accuracy.
- Smooth, powerful Blackhawk hydraulics does all the work.

WD-30 HEAVY DUTY HYDRAULIC WHEEL DOLLY 2600 LB. CAPACITY

Powerful Blackhawk hydraulic unit effortlessly lifts the largest single or dual wheels with just a few strokes of the pump. Extra strong steel tubing solidly supports the heaviest loads. If you service heavy trucks, busses, tractors, off-the-road equipment, you need a Blackhawk WD-30 for faster, more efficient work!

- Full 2600-lb. capacity for heaviest, toughest jobs.
- Perfect alignment of wheel to axle in seconds with leveling adjustment screw.
- Heaviest loads are easily carried any place in shop with swivel wheels and ball bearing caster.

Fast Acting Mobile Lifts

**MOBILE
LIFTS**

ML-30 FRONT END MOBILE LIFT FOR PASSENGER CARS IDEAL FOR SHOP WITH LIMITED FLOOR SPACE

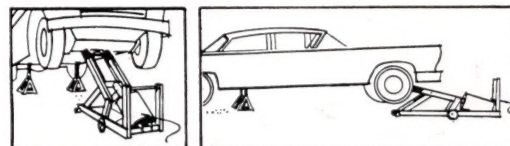

- Stores on end in only 28 sq. in.
- Lifts all four wheels with rocker stands.
- Lifts front end of every car.
- Eight working heights.

SPECIFICATIONS

Capacity	3000 lbs.
Height	28"
Width	28"
Length	56"
High Lift	34"
Shipping Wt.	260 lbs.

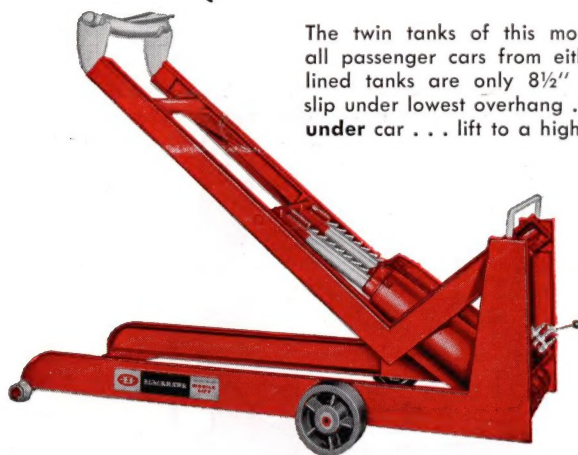

ROCKER HEAD STANDS

RAISE ALL FOUR WHEELS IN SECONDS!

Here's all you do: Raise car to full height. Place rocker stands as far back on side rails of vehicle as possible. Then just lower to stand height. That's all there is to it! Countless jobs can be done faster, easier and without tying up a hoist!

ML-40 TWIN TANK MOBILE LIFT

The twin tanks of this model permit lifting all passenger cars from either end. Streamlined tanks are only 8½" high . . . easily slip under lowest overhang . . . reaches 61½" under car . . . lift to a high 55"! Two safety

ratchets give twice the safety . . . Two tanks give twice the efficiency. Model AX-40 Rocker Stands enable you to lift all four wheels off the ground a full 24½". See page 4 for AX-40 Rocker Stands.

- One piece 76" frame spreads weight evenly.
- Front end adaptor for some late model cars included free.
- Large steel ball bearing wheels allow exceptional maneuverability.
- Lifts 55" high, yet roll back or "chasing" is held to only 4".
- Tops for body repair; brake, wheel-tire, shock work.

SPECIFICATIONS

Capacity	3500 lbs.
Height	31"
Width	31½"
Length	76"
High Lift	55"
Saddle Spread	20¼"
Shipping Wt.	478 lbs.

ML-50 HEAVY DUTY MOBILE LIFT FOR TRUCKS

Solidly built for full 5500-lb. capacity. Model ML-50 lifts either front or rear of truck. Every fleet garage needs one for faster lubrication, steam cleaning, spring and brake jobs, tire and wheel work, replacing axles or under

body painting. This money-saver pays for itself on the first few jobs! Cut-away steel frame gets a long 70" under every truck, clears lowest axles.

SPECIFICATIONS

Capacity	5500 lbs.
Height	33¼"
Width	33½"
Length	70"
High Lift	50"
Saddle Spread	22¼"
Shipping Wt.	520 lbs.

- Lifts from a low of 5½" to a high of 50".
- Two-speed air lift contacts and lifts faster than any other method.
- Swings into position in seconds with large ball bearing steel wheels.
- Mechanical safety ratchets can't slip or falter, always support heaviest loads.

BLACKHAWK®

Manual, electric and

COMPLETE LINE OF 38 BASIC MODELS

One man can lift and transfer up to two tons with a Blackhawk mobile crane. Rugged I-Beam construction, built in brake, standard boom extension for hard-to-reach jobs. Crane folds when not in use, won't take valuable space.

TWO LOW COST ½ TON MODELS

Model MC-50 — Floor model (shown) with four point support for utmost stability, safety. Two swivel casters give exceptional maneuverability. Large 6" load carrying wheels give positive tracking.

Model MC-52 — Has same lifting specifications as MC-50, but has truck mounting well instead of floor frames. Easily removed from well when full truck required. Mounts flush with truck deck. Also easily placed in wells on loading docks, welding tables, machine shops . . . wherever heavy loads are lifted.

MC-5002 Truck Mounting Well only.
MC-5008 Extra 15" Boom only.

MANUAL TYPE — ½, 1 & 2 TON

Manually operated for top economy. Easy strokes of the double-action pump raise the load to a high of 93". Versatility is unsurpassed . . . easily removed from base to mount in truck deck or loading dock. They're perfect to load and unload trucks, tires, barrels, move machinery, remove and replace engines, move heavy shop equipment.

ELECTRIC TYPE — ½, 1 & 2 TON

Get real speed with these mobile cranes! Battery-operated electric power operates Blackhawk hydraulic system. Works three times faster than manual operation and with NO effort! High efficiency hydraulic system means minimum drain on battery. Power supplied by 6 or 12 volt battery (6 volt furnished unless otherwise specified).

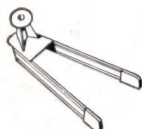

ELECTRIC MANUAL TYPE—½, 1 & 2 TON

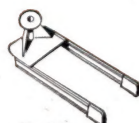

Here's the utmost in versatility! Now have *both* the speed of an electric pump and added value of a hand pump all on one crane. Get fast, continuous operation under any conditions, for any period of time. Get over 150 lifts on a single battery charge. And, if battery runs down, your hand pump is always ready for action! Use as floor or truck crane!

FRAMES AND MOUNTING WELLS

Standard

Straddle

STANDARD "A" Frame furnished unless otherwise specified. It's the universal frame for most lifting jobs.

STRADDLE "A" Frame is invaluable for larger crates, material handling in factories, etc.

Standard

12" Elevated

Move your crane from floor to truck or dock just by installing additional Mounting Wells. Two types available, each can be ordered with special swivel bearings.
